Marking Guide – Scenario Demonstration with Questioning (Level 3 Data Technician)

Assessment duration: 90 minutes (+10% if required)
Assessment type: Open book (internet allowed for guidance, not completion)

Task 1 – Data Gathering and Preparation
KSBs: K4, K5, K6, S1, S2, S3

- **Pass:** Imports correctly, audits datasets, identifies inconsistencies, summarises findings.
- **Distinction (K6, S2, S3):** Systematic, precise collation/formatting; highly organised and aligned to standards.

Task 2 – Data Combination and Transformation
KSBs: K13, K15, S4, S5, S16

- **Pass:** Combines datasets using linking methods, resolves inconsistencies, applies filters with justification.
- **Distinction:** Applies advanced approaches with strong rationale.

Task 3 – Data Validation and Quality Checks
KSBs: K14, K26, S6, S7, S16

- **Pass:** Identifies/corrects issues; applies repeatable validation; demonstrates structured instructions.
- **Distinction (K14, S7):** Evaluates validation options, selects efficient automation, explains scalability.

Task 4 – Data Analysis and Presentation
KSBs: K14, K15, K16, S3, S5

- **Pass:** Identifies trends, produces charts/tables, calculates medals per capita, provides short analysis.
- **Distinction:** Provides deeper insights with clear justification.

Task 5 – Documentation and Output
KSBs: S3

- **Pass:** Clear structured Summary Report covering audit, validation, filtering, analysis.
- **Distinction:** Comprehensive, precise documentation showing advanced understanding.

Assessor Questioning

Minimum of 5 questions. Questions should test:

- Data gathering and auditing (K4, K5, K6, S1–S3).
- Combination/filtering rationale (K13, K15, S4, S5, S16).
- Validation and automation (K14, K26, S6, S7, S16).
- Analysis/presentation choices (K16, S3, S5).

Example distinction questions:

- How did your formatting approach go beyond basic standards? (K6, S2, S3)
- Why did you select this validation method, and how could it be scaled? (K14, S7, S16)
- What further insights could be produced if additional datasets were included? (K16, S5)

Grading

- **Fail:** Does not meet pass criteria.
- **Pass:** Meets all pass descriptors.
- **Distinction:** Meets all pass + distinction descriptors.
